Plant Evergreens Now for Year 'Round Beauty

EVERGREENS

The evergreens are all time-tried, popular varieties of established merit. Each is a quality plant several times transplanted and each has a large ball of native loam, burlap wrapped about roots. The evergreens listed represent only part of the many choice varieties and sizes growing in Little Tree Farms' 200 acre nurseries.

These choice evergreens come to you fresh and are suited to a myriad of uses. Plant them singly on your lawn—in shrubbery borders—at home and garden entrances—as tall screens and hedges—as accents in your flower garden.

Little-Tree EVERGREENS Coniferous and Broad-Leaved

Famous Quality of Unquestioned Value

Evergreens are the greatest factor in successful planting of home grounds and larger landscapes, for they combine in the highest degree beauty and lasting qualities.

The right choice and wise use of evergreens means a home equally beautiful at all seasons of the year. Every one of the evergreens listed here is right for home planting.

THE YEWS

Taxus cuspidata—JAPANESE YEW

A very fine Yew of spreading form. Long lived. The Yews are all remarkably resistant to adverse city conditions and grow even in shade.

Table with 3 columns: Spread, Each, 10. Rows for 2 to 2 1/2 feet, 18 to 24 inches, 15 to 18 inches.

Taxus cuspidata capitata—UPRIGHT JAPANESE YEW

This erect form of the Yew has all the good qualities of the spreading type. It shears readily.

Table with 3 columns: Spread, Each, 10. Rows for 2 to 2 1/2 feet, 18 to 24 inches, 15 to 18 inches.

Taxus cuspidata nana—DWARF JAPANESE YEW

A small slow-growing form of the Japanese Yew.

Table with 3 columns: Spread, Each, 10. Rows for 18 to 24 inches, 15 to 18 inches, 12 to 18 inches.

HEMLOCK

Tsuga canadensis—CANADA HEMLOCK

A most graceful evergreen. Will grow to a beautiful large tree or can be kept small by trimming. Thrives in partial shade and in cold damp locations. Stands almost any amount of shearing.

Table with 3 columns: Height, Each, 10. Rows for 7 to 8 feet, 6 to 7 feet, 5 to 6 feet, 4 to 5 feet, 3 to 4 feet, 2 to 3 feet, 18 to 24 inches.

AZALEAS AND BROADLEAVED EVERGREENS

This most valuable group of large and small shrubs is characterized by broad green leaves which remain throughout the year. Many of them flower or fruit profusely and the glossy foliage and bright blossoms

or berries contrast pleasingly with the more sombre coniferous evergreens. The Azaleas are not evergreen, but they have characteristics similar to those of some of the broadleaved evergreens.

Azalea arborescens—SWEET AZALEA

Fragrant rose tinted blooms in May and June.

Table with 3 columns: Height, Each, 10. Row for 18 to 24 inches.

Azalea calendulacea—FLAME AZALEA

Orange and yellow flowers in early June.

Table with 3 columns: Height, Each, 10. Rows for 18 to 24 inches, 15 to 18 inches.

Azalea kaempferi—TORCH AZALEA

Prolific salmon pink flowers in May.

Azalea nudiflora—PINXTERBLOOM

Pale rose pink flowers in very early spring.

Table with 3 columns: Height, Each, 10. Row for 18 to 24 inches.

Azalea poukhanensis—KOREAN AZALEA

Profuse single lilac purple flowers in May.

Table with 3 columns: Height, Each, 10. Row for 12 to 15 inches.

Azalea vaseyi—PINKSHALL AZALEA

Delicate pink blossoms in April and May.

Table with 3 columns: Height, Each, 10. Rows for 18 to 24 inches.

Buxus sempervirens—BOXWOOD

Table with 3 columns: Height, Each, 10. Rows for 18 to 24 inches, 15 to 18 inches, 10 to 12 inches.

Cotoneaster horizontalis — ROCK COTONEASTER

Small box-like leaves. Bright red berries.

Table with 3 columns: Height, Each, 10. Row for 15 to 18 inches.

Daphne cneorum—ROSE DAPHNE

Fragrant pink flowers in April-May and fall.

Table with 3 columns: Height, Each, 10. Row for 10 to 12 inches.

Euonymus radicans—WINTERCREEPER

Self-clinging vine—or trailing evergreen. Red berries.

Table with 3 columns: Height, Each, 10. Row for 12 to 15 inches.

Euonymus rad. vegeta—BIGLEAF WINTER-CREEPER

Evergreen Bittersweet—clings to any rough surface. Red berries.

Table with 3 columns: Height, Each, 10. Row for 12 to 15 inches.

Kalmia latifolia—MOUNTAIN LAUREL

Clusters of pink flowers in June.

Table with 3 columns: Height, Each, 10. Rows for 18 to 24 inches, 15 to 18 inches.

Leucothoe catesbaei—DROOPING LEUCOTHOE

An exquisite small shrub. White flowers in June.

Table with 3 columns: Height, Each, 10. Rows for 18 to 24 inches, 15 to 18 inches.

Pachysandra terminalis—JAPANESE SPURGE

One of the finest ground cover plants. Grows 6 to 8 in.

Table with 3 columns: Height, Each, 10. Row for 2-yr. field grown.

Pieris floribunda—MOUNTAIN ANDROMEDA

(Lily-of-the-Valley Shrub.) White flowers in spring.

Table with 3 columns: Height, Each, 10. Row for 15 to 18 inches.

Rhododendron carolina—CAROLINA RHODODENDRON

Bright pink flowers in May and June.

Table with 3 columns: Height, Each, 10. Rows for 18 to 24 inches, 15 to 18 inches.

USE PEAT MOSS

In Planting Your Evergreens

Peat Moss is a highly absorbent, moisture retaining material, weed and fungus free which contributes to the humus-forming qualities in the soil. A true and acid peat and a native soil element for all evergreens.

Use Peat Moss in planting all evergreens—one-third peat to two-thirds soil mixed thoroughly. Use Peat Moss also as a three-inch mulch on all evergreen plantings. It conserves moisture, keeps down weeds and improves the appearance of evergreen beds.

We offer fine quality imported Peat Moss (one bale will cover 80 sq. ft. approximately 3 inches deep).
